Negotiators' Report For Week Ending March 26, 2010

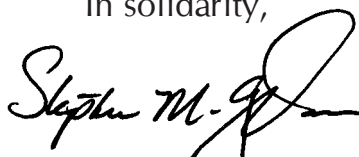

This week your negotiating team met with the Company in Seattle. During this session they provided the Company our proposals regarding Article 2-Recognition and Scope of Agreement (job security) and Article 3-Status of Agreement (merger protection). They spent a lot of time researching these articles by utilizing resources from the Grand Lodge and looking at language in other IAM contracts - Hawaiian, United, Northwest and Southwest. We got the message from our membership during station visits that they are very concerned with these two issues so that is why we have addressed them early in the game. The Company will know it is very important to us to achieve reinforcements and improvements in these areas.

At the conclusion of our second full week of negotiations there have been a total of 12 articles exchanged. Although we have no tentative agreements on any of these articles, we have had some very thorough discussions, which we feel will lead to tentative agreements in the future.

Our next scheduled negotiations session with the Company is May 3-7, 2010. During the month of April, your negotiators are planning station visits and will be preparing additional proposals for upcoming sessions.

Stay Union. Stay Strong.
